

## Instructions

Currently Running on python 3.8

1. Login by username and password (page created but not incorporated into current version)
2. Create an account (not done)
3. Click on recipe search page
  - a. Enter in search criteria separated by commas (case insensitive)
  - b. Click search button to display results

The screenshot shows a web application window titled "Recipes". At the top, there are two tabs: "Meal Search" (which is active) and "Profile". Below the tabs, there is a search form with five input fields, each with a label: "Enter usernames (separated by commas):", "Enter ingredients (separated by commas):", "Enter cooking tools (separated by commas):", "Enter dietary restrictions (separated by commas):", and "Enter cuisine type (separated by commas):". The "Ingredients" field contains the text "Salt", and the "Cooking tools" field contains the text "oven". To the right of the input fields is a "Search" button. Below the search form, there is a large rectangular box containing the text "Focaccia Bread".

4. Click on the meal search button to display all meal names
  - a. Click on a meal and display all of its details (not completed)

- b. Search using search criteria (not completed)
- 5. Profile
  - a. Display personal recipes and meals (not completed)
